

Minnesota Historical Society

In our Men's Suits we are offering some rare bargains that won't lay on our counters very long at the price we have marked them at. Commencing at \$6, we are showing several different styles in heavy weight cassimeres that would be good value at \$10; and for \$8, \$10 and \$12 we can show you hundreds of patterns to choose from that will make you wonder how we can afford to sell them for so little money. Then we go along up from \$15, \$18, \$20, to \$25. We wish particularly for those who have been in the habit of paying exorbitant prices for tailor-made garments to step into our establishment and try on some of the latter mentioned. We are satisfied you will then quit your tailor.

in endless variety, and at prices that no one need be without one. Examine our stock of \$7, \$8 and \$10 top coats before you lay out a dollar elsewhere, and for \$12, \$15, \$18, up to \$25, any style or make you wish.

Nowhere can you find such a stock of goods under one roof for the little fellows as we have laid in. We want to make this one of the most popular departments of our store, hence this immense stock and low prices have alone got to do the work.

DULUTH, MINN., TUESDAY OCTOBER 2, 1888 - FIVE O'CLOCK.

PRICE TWO CENTS.

The Great Eastern FALL STOCK

OF CLOTHING, HATS AND FURNISHING GOODS is the talk of the town. "What an immense stock, and what pretty styles this season," are exclamations of surprise heard in every corner of our store by hundreds of people who visit us every day, and at such low prices that everybody can afford to go well dressed for a mere trifle.

In our Men's Suits we are offering some rare bargains that won't lay on our counters very long at the price we have marked them at. Commencing at \$6, we are showing several different styles in heavy weight cassimeres that would be good value at \$10; and for \$8, \$10 and \$12 we can show you hundred reds of patterns to choose from that will make you wonder how we can afford to sell them for so little money. Then we go along up from \$15, \$18, \$20, to \$25. We wish particularly for those who have been in the habit of paying exorbitant prices for tailor-made garments to step into our establishment and try on some of the last mentioned. We are satisfied you will then quit your tailor.

FALL OVERCOATS

LOST ON THE LAKE.

The Schooner Brandon from Montreal Goes Down a Hundred Miles from Duluth

IN YESTERDAY'S TERRIBLE GALE.

Another Schooner of the Tow Abandoned by Her Tug but Probably Still Afloat.

The tug Walker arrived in port shortly before noon today towing the single schooner Regina. When the boats left the Sault last Wednesday night there were four of them, the tug Walker leading, and followed by the schooners Brandon, Regina and Jeanie. The Brandon is lying at the bottom of Lake Superior some where near the Apostle Islands, the Jennie is in about the same locality but probably afloat, and the Walker and Regina are here badly the worse for wear.

For the past few days there has been a terrible storm on Lake Superior, a little of the fog and which Duluth left during the early part of this morning. Vessels men arriving today reported it as bad as any they ever experienced with a tremendous sea running and a fierce wind from the northwest. After pulling along through the tremendously heavy weather of yesterday until afternoon, the forward schooner, the Brandon, broke her steering gear and rolled helplessly in the trough of the sea. The tug Walker connected her with the tug soon broke, thus separating the entire tow from their tug. After long effort the Walker was able to get around the Brandon and take off her entire crew and she was also able to pick up the tug of the Regina, but the third schooner, the Jennie, it was found impossible to get hold of and save either the tug or other schooner. Therefore the Jennie was left to drift for herself and at dark last night when the Walker and Regina lost sight of her she was coming along toward Duluth as well as could be expected. Her crew was left on the vessel and has anything happened to her since dark the entire crew are undoubtedly drowned. The tug started out shortly after noon today to look for the Jennie, and if she is all right will be here with her tomorrow at the latest. Many vessels men here and captain coming in this morning are of the opinion that she will be found all right, while others are not so sanguine and believe that the foundering of the schooner. The board returned so to and formally notified Mr. Harrington of the Chicago Inter Ocean says: Considerable interest was manifested in the operation of a motor of the fair sex who called upon the secretary shortly after the opening Saturday, and asked to be referred to a good broker, stating at the same time that she was the owner of a farm in Duluth, and had been offered a certificate for line elevators for sale. The gallant secretary was somewhat abashed at the unexpected occurrence, but quickly recovered himself and secured her the services of a broker. She instructed him to sell her warehouse property at \$100,000. He was a member in Chicago. The deal was consummated and the property was sold at a profit of \$30,000.

The tug Walker broke her steering gear and while it was being repaired a second accident happened to her Engineer, John J. O'Brien. He was at work on the tug when the rudderport was accidentally caught the rudder and swung it around, causing the cabin filler to strike O'Brien on the head. His left eye is gone and that of his head completely. He is now at St. Luke's hospital and will probably recover. He is an old friend and schoolmaster of Messrs. O. S. Rose and Hugo, of this city.

The loss of the Brandon emphasizes the danger of the conflict in the North Pacific, and the fact that the vessel was loaded with 1,064 tons of railroad iron for the Great River Valley road. The Jennie had 828 tons and the Regina 750, both for the same road.

ON 'CHANGE.

A STRONG UPSET MARKET WITH COMPATIVELY LITTLE BUSINESS IN FUTURES.

Wheat opened here firm and higher by 1 to 1 1/2 cent above last night's close, and advanced on the early market considerably. Later it ruled dull and steady, but the close was remarkably firm and strong. Chicago was exceedingly erratic all day with frequent jumps and breaks of 1 to 2 cents at a jump. The Chicago market was not affected here other than to restrict trading until the thing there got settled down. There was, therefore, but little trading and that confined to December and May.

Cash sold at 115 1/2 and 115 3/4 for 1 hard with a nominal profit at 115 1/2. Northern sold at 108, 2 northern at 102. October opened 1 cent up at 114 1/2 to 115 1/2, where trading stopped, but closed at 115 1/2. December opened at 113 1/2, went steadily up to 115 1/2, which was the close. May started at 115 1/2, went up from yesterday, closed next at 116, weakened to 115 1/2, sold last 115 1/2, but closed later at 117 bid.

Shipments of wheat for September were 1,381,087 bushels.

The schooner founded last night were chartered by Barnes & Thomson for wheat to Montreal.

Both wheat this morning are very strong. Wheat cargoes off coast very strong, wheat on passage and for shipment open with very good demand. French country markets are a turn dearer. Weather in England very cold at the opening, said a broker, "Chicago was 3 1/2, I went out for a minute and she had gone to 3 1/2, I looked around to the back of the blackboard, came back and Chicago was 3 1/2, that's a market for anybody."

Wheat receipts today are 31,245 bushels with shipments of 369 bushels and 5,185 bushels of corn. The current-day wheat last year receipts were 115,729 and shipments 165,500. Cars on track this morning are 76, all on the Northern Pacific road.

The break and bulge at Chicago had little effect here, for Duluth was strongly on the uptick, while the market at the other end, however, of curbing trading and a number of dispatches were sent from houses here to their western customers to hold out until Chicago was settled.

Flour business keeps lively. For the week ending September 29th, 20,000 barrels and shipments 40,179, a decrease of 5,155 barrels. There is an store today 59,387 barrels and 31,184 at same date last year. Of the shipments 3,874 and 17,500 and Buffalo 12,300 barrels.

C. M. Harrington, secretary of the Star elevator company of Minneapolis has asked the state board to license certain annexes of their elevator, but they have been refused and free from any of the restrictive imposed by law on a public warehouse. The board refused so to and formally notified Mr. Harrington of the Chicago Inter Ocean says: Considerable interest was manifested in the operation of a motor of the fair sex who called upon the secretary shortly after the opening Saturday, and asked to be referred to a good broker, stating at the same time that she was the owner of a farm in Duluth, and had been offered a certificate for line elevators for sale. He was at work on the tug when the rudderport was accidentally caught the rudder and swung it around, causing the cabin filler to strike O'Brien on the head. His left eye is gone and that of his head completely. He is now at St. Luke's hospital and will probably recover. He is an old friend and schoolmaster of Messrs. O. S. Rose and Hugo, of this city.

The loss of the Brandon emphasizes the danger of the conflict in the North Pacific, and the fact that the vessel was loaded with 1,064 tons of railroad iron for the Great River Valley road. The Jennie had 828 tons and the Regina 750, both for the same road.

The tug Walker broke her steering gear and while it was being repaired a second accident happened to her Engineer, John J. O'Brien. He was at work on the tug when the rudderport was accidentally caught the rudder and swung it around, causing the cabin filler to strike O'Brien on the head. His left eye is gone and that of his head completely. He is now at St. Luke's hospital and will probably recover. He is an old friend and schoolmaster of Messrs. O. S. Rose and Hugo, of this city.

The loss of the Brandon emphasizes the danger of the conflict in the North Pacific, and the fact that the vessel was loaded with 1,064 tons of railroad iron for the Great River Valley road. The Jennie had 828 tons and the Regina 750, both for the same road.

STANLEY, THE EXPLORER.

Bishop Walker, of Springfield, Makes a Few Remarks.

SPRINGFIELD, Ill., October 2.—Bishop Walker, a distinguished African Bishop of the Methodist church, before leaving Springfield expressed his views on the disappearance of Henry M. Stanley the African explorer: he said "from his knowledge of conditions of things in Africa it was highly probable that Stanley has gone into the interior of the country where he could not be heard from for a year or two and that interested persons were taking advantage of his absence to create friendship for individuals schemes to organize searching parties whose real object was something else than recovery or assistance to Stanley."

BRIBED BY CHINAMEN.

Hawaiian Legislators Pay Heavily for Itching Palma.

SAN FRANCISCO, October 2.—The supreme court of Hawaii has decided that the trustee appointed by the legislature to pay the debts of King Kalakaua must refund to the king the Chinese, Ah Ki, \$21,000 which Ah Ki paid the king for a monopoly of the opium traffic. Four members have been expelled for accepting bribes from Chinamen to vote against the bill restricting Chinese immigration. King Kalakaua goes to Meiburn's 21st month to attend the exposition. The Hawaiian Steamship company mail subsidy was rejected by a vote of 45 to 27 in the New Zealand parliament. The friends of the measure will revive it at the May session provided assistance from the United States is secured.

MINNESOTA REPUBLICANS.

Reach Indianapolis and are Enthusiastically Received.

INDIANAPOLIS, Ind. Oct. 2.—On Harry's the morning extended upon his fourteenth week of public receptions and speeches. The first delegation to put in an appearance arrived about eight o'clock. It was a small but enthusiastic band of thirty-five Republicans, but they came a long distance, from the town of Tower, Minn.

Coal Mines Strike.

BELLEVILLE, Mo., Oct. 2.—Coal miners in this district, composed of Macoupin, Modesto and St. Clair counties numbering about 15,000, refused to go to work yesterday morning because the consolidated company and custom companies refused to give them 2 1/2 cents per bushel top weight, what they demanded.

A Receiver Appointed.

CHICAGO, Oct. 2.—Herman McChesney was appointed receiver of the Traders bank, corner of Madison and La Salle streets this morning by Judge Shepard under a petition filed by Thomas F. Tallan, 900

A Whirl of Excitement.

CHICAGO, Oct. 2.—The board of trade opened this morning with a whirl of excitement in the wheat pit. December was the article of attraction and it lasted about an hour before the market was again in a fashion to make traders' heads swim.

Snow in Michigan.

LANSING, Mich., Oct. 2.—Heavy snow has been falling for the past six hours and reports from a number of points in upper peninsula show the storm is general.

PERSONAL MENTION

R. Angot, the railroad man from Two Harbors is here.

C. P. Craig has gone to Pennsylvania for a visit of several weeks.

John Flynn, sheriff of Carlton county was here today with his wife.

His car left for Duluth this morning for a three month's visit in the east.

Thos. Vigne and wife left last night for Washington, D. C., on business.

LONDON MURDERS.

Another Murder in the Eastern Portion of London—The Murderer is Arrested.

EXCITEMENT AGAIN AT PEVER PITCH.

The Police Deny all Reports of the Murder or Arrest of the Criminal.

LONDON, Oct. 4.—The excitement caused by the recent murders of a number of women in the eastern section of London was increased this morning on the public announcement that a watchman had been killed in Shadwell by a man who was in company with a woman and who was being shadowed by the watchman. It appears that last night the watchman saw a man and woman go behind a board fence erected in front of a new building. Becoming suspicious the watchman followed the couple and finally called the policeman. The man at once turned on the watchman and pursued him and stabbed him to death. The murderer was arrested a few minutes later and is said to be now in jail. Police authorities deny the report given above that a watchman was murdered in Shadwell last night and state that it is a mistake. It is understood, however, that this is merely a blind and the popular excitement is not in the least allayed.

GARRETT'S FRIENDS.

They Propose to Visit Him and Ascertain if His Mental Condition is as Bad as Reported.

BALTIMORE, Oct. 4.—Three prominent residents of this city who were formerly close personal acquaintances of Robert Garrett, and were daily seen with him in conversation at his club, will leave for New York in a day or two for the purpose of paying a visit to the alleged demented millionaire. Remarkable as it may seem, a very strong opinion is entertained by many of Mr. Garrett's warm friends in this city that his condition is not as bad as is pictured almost daily in the newspapers from New Jersey, and that there is some underlying motive for making his mental condition appear as serious as possible. It is for the purpose of satisfying themselves on this point, and of securing a denial or confirmation of the opinion that the gentlemen in question will endeavor to secure a surgeon who will examine the ex-railroad king. A communication has been sent to the family on the subject and although no reply has as yet been received, it is not believed that any obstacles will be placed in the way of the proposed visit.

NO SPEECHES.

Thurman to Visit Cleveland and Witness the Inauguration of Chief Justice Fuller.

COLUMBUS, Ohio, Oct. 4.—Unless a change in his plans are made, Mr. Wm. C. Thurman will leave for Washington tomorrow morning. He will be accompanied by his son Allen W. Thurman. He will make no speeches either going or returning and will absolutely decline to respond to any impromptu demonstration. On Saturday morning he will have a consultation with Solicitor General Jenks and in the afternoon he will be driven out to Ohio. View where he will remain a guest of President Cleveland until Monday morning. On that day he will attend the opening session of the supreme court for the purpose of witnessing the inauguration of Chief Justice Fuller and on Tuesday and Wednesday he will argue the Bell telephone case. His present intention is to return home by Saturday of next week.

ILLINOIS VETERAN'S REUNION.

Republican Orators Entertain Them Tomorrow.

CAIRO, Ill., Oct. 4.—Today will be a memorable one in the annals of the Eastern Illinois Veteran's association now holding their annual reunion here. Governor Oglesby, the Hon. J. W. Filer and Col. Wolfe will be among the orators of the occasion and a notable Republican rally will be the result. Captains G. W. Harwood and J. W. Harwood are hospitably providing for the guests of the association irrespective of political affiliations. There will be an luncheon for the Democrats when General Palmer, Major Connolly, General Carey and other notable Democrats will be present. The gathering will be fully as large and demonstrative as today and bring the reunion to a close.

IN JACKSONVILLE.

The Fever Decreasing Steadily—No New Cases and No Deaths Today.

JACKSONVILLE, Fla., Oct. 4.—At the board of health the registers show no new cases and no deaths. At the medical bureau about twenty calls for physicians have been made by patients, most of them colored. The weather is oppressively warm today.

Americans to be Banqueted.

BERLIN, Oct. 4.—The American delegates to the international American Congress in session here will give a grand reception tonight to their colleagues, including several of the most eminent scientists and savants of Europe who have taken a conspicuous interest in the success of the convention.

Will Strike Saturday.

CHICAGO, Oct. 4.—The conductors and drivers of the North side will probably have to strike Saturday to enforce their demand of shorter hours and better pay. President Yerkes has given out that the company has no further proposition to offer.

The Georgia Sale.

GLASGOW, Oct. 4.—The State Line steamer State of Georgia, Captain Woodie, from New York September 20th, about which some letters were sent in consequence of the length of her voyage, arrived here at 5 o'clock this morning.

The Day's Visitors.

INDIANAPOLIS, Ind., Oct. 4.—The first delegation of the day to visit Gen. Harrison came from Grand Rapids and Muskegon, Mich., and numbered over 400.

The Weather.

WASHINGTON, Oct. 4.—Indications for 24 hours: Iowa, Minnesota, late followed Friday by cooler southerly winds turning to northwesterly winds.

Dr. Metcalf Returned.

Dr. Metcalf the dentist has returned from his hunting trip and is again at his office ready to resume work.

MUTUAL SYMPATHY.

Meeting of the Newly Organized Woman's League to Promote the Conditions of Their Associations.

CHICAGO, Oct. 4.—The first public meeting of the newly organized Woman's League to Promote the Conditions of Their Associations, was held today under the presidency of Frances Willard. The seven associations already established under the management of women throughout the state will be represented in the new council or league. The council will be in the main composed of the heads of all these different societies and is expressly intended for purposes of mutual sympathy and counsel among all organizations of women which have for their aim the improvement of human conditions, the promotion of fraternal relations and better acquaintance with the aims and methods of each, better facilities for intercommunication upon subjects of common interest and also for the purpose of correcting a wrong impression that has already gone abroad concerning the League. The League is a new organization that has been organized for the purpose of "making women voters," although the English Suffrage society, like many others, will have a representation in the league.

HARRISON'S RECEPTION.

Thousands of Delegates Already Arrived in the City to Participate in the General Saturday Reception.

INDIANAPOLIS, Oct. 4.—Delegations have been arriving in the city all the morning trains apparently from all points of the compass and those from Grand Rapids, Mich., Leavenworth, O. Jay county, and other places will be received by General Harrison during the day. Additional delegations will arrive tomorrow and they will all participate in the general Saturday reception probably as well. Notwithstanding the large number of receipts recorded by General Harrison, thousands of visiting friends and supporters are here and the city is crowded. The close of these occasions as at their commencement are being met with a feeling of delight and gratification to his friends to find that he does not seem to need it.

HE LAUGHED.

That is What Governor Hill Did When Told of His Appointments to Make Speeches in Indiana.

ALBANY, N. Y., Oct. 4.—Governor Hill laughed heartily today when told that the Democratic state committee intended to get as much work out of him as possible on the occasion of his forthcoming visit to Indiana and said that he had not as yet been advised of the appointments. Shortly after he received telegraphic advice to the effect that he was to deliver his first speech at Mitchell, Ind., at 2 p. m. of October 12th, at Seymour, at 2 p. m. of October 13th, at Ellettsburg, at 2 p. m. of October 14th, at Indianapolis, at 2 p. m. of October 15th, at Terre Haute, at 2 p. m. of October 16th, at Evansville, at 2 p. m. of October 17th, at Nashville, at 2 p. m. of October 18th, at Louisville, at 2 p. m. of October 19th, at Cincinnati, at 2 p. m. of October 20th, at St. Louis, at 2 p. m. of October 21st, at Kansas City, at 2 p. m. of October 22nd, at Omaha, at 2 p. m. of October 23rd, at St. Paul, at 2 p. m. of October 24th, at Minneapolis, at 2 p. m. of October 25th, at Chicago, at 2 p. m. of October 26th, at Detroit, at 2 p. m. of October 27th, at Cleveland, at 2 p. m. of October 28th, at Buffalo, at 2 p. m. of October 29th, at Albany, at 2 p. m. of October 30th, at New York, at 2 p. m. of November 1st, at Philadelphia, at 2 p. m. of November 2nd, at Washington, at 2 p. m. of November 3rd, at Baltimore, at 2 p. m. of November 4th, at New Orleans, at 2 p. m. of November 5th, at St. Petersburg, at 2 p. m. of November 6th, at Moscow, at 2 p. m. of November 7th, at London, at 2 p. m. of November 8th, at Paris, at 2 p. m. of November 9th, at Rome, at 2 p. m. of November 10th, at Vienna, at 2 p. m. of November 11th, at Berlin, at 2 p. m. of November 12th, at Hamburg, at 2 p. m. of November 13th, at Frankfurt, at 2 p. m. of November 14th, at Cologne, at 2 p. m. of November 15th, at Bonn, at 2 p. m. of November 16th, at Dusseldorf, at 2 p. m. of November 17th, at Essen, at 2 p. m. of November 18th, at Dortmund, at 2 p. m. of November 19th, at Bremen, at 2 p. m. of November 20th, at Hanover, at 2 p. m. of November 21st, at Kassel, at 2 p. m. of November 22nd, at Wiesbaden, at 2 p. m. of November 23rd, at Fulda, at 2 p. m. of November 24th, at Schweinfurt, at 2 p. m. of November 25th, at Bamberg, at 2 p. m. of November 26th, at Regensburg, at 2 p. m. of November 27th, at Landshut, at 2 p. m. of November 28th, at Pilsen, at 2 p. m. of November 29th, at Brno, at 2 p. m. of November 30th, at Prague, at 2 p. m. of December 1st, at Vienna, at 2 p. m. of December 2nd, at Budapest, at 2 p. m. of December 3rd, at Pest, at 2 p. m. of December 4th, at Buda, at 2 p. m. of December 5th, at Pest, at 2 p. m. of December 6th, at Buda, at 2 p. m. of December 7th, at Pest, at 2 p. m. of December 8th, at Buda, at 2 p. m. of December 9th, at Pest, at 2 p. m. of December 10th, at Buda, at 2 p. m. of December 11th, at Pest, at 2 p. m. of EVENING HERALD.

The DULUTH EVENING HERALD is issued from 24 office in the Blaine block every afternoon except on Sundays. Last edition at 6 o'clock. The DULUTH HERALD will be delivered to any part of the city or mailed to any address for fifty cents per month.

The best advertising medium in Northern Minnesota. Special attention given to securing results to those who use its columns.

DULUTH HERALD CO., Publishers.
MILBURN, JR.,

OFFICIAL PAPER OF DULUTH.

The Buffalo Times of last Thursday contains a startling piece of information. It states under a glaring head on the first page that Minnesota is certain to give its electoral vote to Cleveland and Thurman. The article is in the form of an interview with "Mr. Brown, connected as a representative of the St. Paul Globe." Mr. Brown commences by making this amazing announcement: "Minnesota will take her place in the Democratic column. She will give the democratic electors a plurality of from 10,000 upwards. You can get all the votes you want in Minneapolis or St. Paul on this majority and you can get two to one that Minnesota's electoral vote will go to the democratic candidates." Mr. Brown then proceeded to tell what an awful row there is in the Republican camp because of Merriam's nomination. He says the Scandinavian element is solid for Cleveland and reform and that Knute Nelson is supporting Cleveland and Thurman. The prohibition strength, according to this oracle, is greater than ever before and it all comes from the Republican camp. The final remark of Mr. Brown would indicate that he was a capper for some sport, who is anxious to get a bet on Minnesota for he says:

"You can wager every cent that Minnesota is as sure for the democrats this fall as is Georgia."

If Democratic claims are all based on as flimsy foundations as this one of the Buffalo Times Cleveland might as well throw up the sponge.

Senator Sherman yesterday addressed the senate on the senate tariff bill. He severely criticized the Mills bill and said that in his judgment there would be four defects found in the new bill. Among other things it was a substantial compendium of provisions for the collection of the internal revenue and of the customs duties. It contained a positive reduction of revenues to the extent of \$78,688,000. The reduction was on a few articles. He believed that the senate bill was on the whole the best revenue bill ever introduced in congress, and that if it could be taken up free from party prejudices and considered and debated and amended, it might be made the most perfect revenue measure ever put on the statute books. The issue was now fairly made. It was a plain, square issue between a "tariff for revenue only," and a "tariff for revenue and protection."

If we may credit the St. Louis Globe Democrat, the so-called Flor Trust, into which many of the western millers were drawn, has signally failed to accomplish the objects of the combine. "Every day," they are told, "prices are being cut, and it is almost impossible to fix the price of violating the terms of the agreement on any particular person. Excesses are readily given, and each knowing himself to be guilty, cares little to pay closely into the others' methods of doing business," etc. etc. The old, old story.

James G. Blaine opened his Michigan campaign yesterday at Detroit. He was listened to by 8,000 people, but did not talk about the tariff. He devoted his attention to the president's vetoes of pension bills and the course pursued by the administration in disposing of the surplus, and for twenty-three minutes he scored Mr. Cleveland as he never scored before, and he started leaving his audience to draw their own conclusions.

Minneapolis is agitated over municipal politics. Doc Ames has declined to be a candidate for another term and as a consequence there are any number of men in both political parties who have announced their willingness to serve as the chief executive officer of the floor city.

Grover Cleveland's civil service record is being pretty well aired in the United States senate, the Senate circular being the subject of discussion. This notorious document instructs commanders of arsenals to give the preference to Democrats in making appointments.

Bob Barlett has turned preacher. His reputation as humorist is so well established that unless he is very careful his sermons will be looked upon as good jokes.

The Tower delegation to Indianapolis furnished the material for one of Gen. Harrison's speeches to a party of visiting working men yesterday.

Is Not This So?
"I remember a mass of things, but nothing distinctly," of course you do, and as does every one else affected with poor memory. But here's a "cure" worth much money. Send for Prof. Loebette, the great memory specialist, 237 Fifth Avenue, New York, for a copy of his prospectus, take his course on memory training, and, our faculty will be how to forget, not how to remember. Thousands of prominent people endorse it."

Dissolution Notice,
The hardware firm of Theban & Armond at 411 East Fourth Street, Duluth, is this day dissolved by mutual consent. Herman Theban will continue business at the old stand and collect all debts and pay all bills.
M. F. ARMOND,
HERMAN THEBAN.

Excursion Tickets on Sale,
Saturdays and Sundays to Upper Lake St. Croix at one fare for round trip. City Depot Office of "Omaha" line.

Details of the Pen Making Industry of the Present Time.

The first steel pen was made by an Englishman named Wile. It was cylindrical and adjusted to a house case for pocket use. It was too expensive, however, to come into general use, and was a clumsy instrument at best. Various attempts were made to improve upon Wile's invention, and among others working to this end was a Birmingham Jew named Meyer. Meyer had a pretty daughter just going through the interesting process of falling in love with a young cutter by the name of Gillett. In her paragon of emulous industry she would tell her lover all she could learn during her rational hours of her father's progress. Young Gillett encouraged this confidence, having an eye to business as well as to the girl, and the result was that after securing the latter, he anticipated his father-in-law, and started a factory for the making of the very kind of pens the old man had spent years in devising. The world knows what Gillett has done—by the way, in England the first syllable of his name receives the accent. Birmingham is today the steel pen trade center of the world, though there are three prosperous manufacturing in this country. Birmingham could readily fill an order for four or five hundred thousand gross a week's notice.

How are pens made? Take a sheet of Sheffield steel six feet long, two and a half feet wide and one-eighth of an inch thick, and cut it into strips each large enough to make two pens. Anneal these strips by placing them into pots with clayed lids and leaving them over night in the "muffle," or oven, which is kept at an intense heat. When they are cooled scour them with acid to remove the scales and brighten them. Roll them to the gauge desired and take them to the cutting shop to be transformed into blanks by hand presses worked by women, who make from ten to twelve English shillings per week at this, their first work in a factory. Thence they go to the plating shop, where a hand press makes the slits in the sides. After being cleaned in sawdust to remove the grease they go to the hardening shop and spend a second week night in pots in the "muffle." Next comes the stamping room, where the firm name and trade mark are received. Thus far they have been merely flat blanks. Now comes the transformation scene. In the raising shop they are given the semi-circular shape that makes them pens. After a brief incision in the "muffle" they are given an oil bath, shaken in a revolving cylinder till the droppings are removed and saved, and then wiped dry in drums with a sawdust towel. It may be mentioned incidentally, and as an indication of American enterprise, that almost precisely the same revolving cylinder arrangement is used for steel pens in England for removing the oil from steel pens has been recently patented in this country as an original invention, and is doing duty at most of the Chicago distilleries separating slips.

IN THE TEMPERING SHOPS.
In the tempering shop a hundred gross are put in a single drum and turned slowly over a charcoal fire, a man with a long handled ladle watching the changing color, scooping them up at the proper instant and spreading them on a cooling pan. In the cooling shop they again encounter sawdust in a drum; in the slitting shop a hand press makes the slits in the pen; in the grinding shop they are treated to either straight or cross grinding, the latter being considered preferable. The back of the pen is shaved ready to which point it has been subjected. The longest stay is in the polishing shop—two days—the time being spent in the most intimate intercourse with the rubbish known as "pot," and in re-volving drums. They emerge polished and with the sharp corners worn off the points. Then another trip is made to the tempering room, where they are given a blue, light, dark blue, or any other desirable color, into which many of the western millers were drawn, has signally failed to accomplish the objects of the combine. "Every day," they are told, "prices are being cut, and it is almost impossible to fix the price of violating the terms of the agreement on any particular person. Excesses are readily given, and each knowing himself to be guilty, cares little to pay closely into the others' methods of doing business," etc. etc. The old, old story.

James G. Blaine opened his Michigan campaign yesterday at Detroit. He was listened to by 8,000 people, but did not talk about the tariff. He devoted his attention to the president's vetoes of pension bills and the course pursued by the administration in disposing of the surplus, and for twenty-three minutes he scored Mr. Cleveland as he never scored before, and he started leaving his audience to draw their own conclusions.

Points Concerning Italian Etiquette.

No one gets very intimate with the Italians. They are very warm hearted, sociable and easy up to a certain point; there it ceases. The young diplomats who live in Rome notice this; although they have lost their customs, they have kept their customs, and one of these is a certain repellant atmosphere when extreme intimacy is expected. There is in Rome—the more the pity—a slow crushing of the pictures; but, although a Roman princess may wear a modern gown and retain nothing of the past but her splendid jewels, she is the same proud lady that she was, or that her great grandmother was, and she, like her, repels intimacy or familiarity beyond a certain point.

One very important point is that they never wish to be touched. In our country a lady talking with another will often lay her hand on her friend's arm; this is considered a very great and objectionable familiarity by an Italian. "Never touch the person; it is sacred," is an Italian proverb. A lady in Italian society, to be very polite, will shake hands when introduced, and she will do so the first time, but she rarely extends her hand the second time; she makes a deep and graceful courtesy to her friend. In addition, she comes, takes her hand and presses it to her heart; but there is nothing of the free, easy, caressing, none of that intimate kissing, nothing like the superficial intimacy which we observe between American women—Home Journal.

A Life on the Ocean Wave.

Indurates the stomach against sickness, but a single or occasional transit across the "illimitable wetness" is productive of serious illness, especially when it is stormy. Ocean travelers, yachtsmen, ship surgeons, commercial buyers sent abroad, voyagers by steamboat, and all who are occasionally or frequently called upon to be where "illimitable wetness" should take along Hostetter's Stomach Bitters, the most known antidote for sea sickness, malaria, biliousness, and disorders of the stomach and bowels. Many travelers by railroads, with delicate stomachs and nerves, likewise suffer severely en route. These will find the Bitters surely helpful and comforting. Traveling is swift, steady and commodious steamships and sumptuous railroads, is not always a source of enjoyment and delight, and the Bitters does much to counteract the discomforts and annoyances of travel. It cures indigestion, Rheumatism, brought on by damp weather, kidney troubles and debility, are effectively relieved by the Bitters.

Special Half-Fare Harvest and Land Excursions.

To prominent points in northwestern Iowa, southwestern Minnesota, Nebraska and Dakota, will be run by the Chicago & North Western Railway, August 21, September 11 and 23, October 9 and 23. Tickets will be sold at one fare for round trip, and will be good to return within thirty days from date of sale. For full particulars apply to the agent at which tickets will be sold, and to what particular points in above states, as well as to certain points in Kansas and Texas, call on the nearest agent of this company or

Wonderful a Book at One Reading.
What! acquire the substance of a difficult book at one reading? Yes, without any doubt. This has been accomplished by Prof. A. Loebette's system of memory training. The Professor has taught this marvelous method to thousands of students in all colleges of the country, to classes of 100 at Baltimore, 1000 at Detroit, 1500 at Philadelphia, 1119 at Washington, 1216 at Boston, etc. He also teaches it perfectly by correspondence. He has written a book, "The Memory Training," which strengthens the memory for every service. Write for prospectus to Prof. A. Loebette, 237 Fifth Avenue, New York.

To Whom It May Concern,
This certifies that the Rhode Island Underwriters' association, (insurance company) through their agents here, Messrs. Macgregor & Bowler, room 10 Metropolitan block, have settled my late loss by fire in full and to my entire satisfaction, and I cheerfully recommend them for fair dealing and honesty to all my friends and acquaintances.

Mrs. JOSEPHINE HUMPHREY.
To All Parties Concerned,
On or before December 1st, 1888, I shall leave Duluth permanently and I desire to leave a straight record behind me. I therefore request all parties to whom I am in any way indebted, to mail or send me a statement of account. I shall be able in a short time to liquidate all accounts, bills and will take pleasure in doing so.

CHARLES C. BROWN.
Duluth, Sept. 28, 1888.
We hereby notify whom it may concern that we will, after this date, hold ourselves responsible for goods supplied to any person or persons, unless we are notified by word of mouth or in writing, or we will pay any "dine bill" presented by another party to whom we have not issued and on his personal receipt.
JOHN S. WOLFE & CO.

St. Paul & Duluth
RAILROAD.

The Short Line
TO
ST. PAUL,
Minneapolis and Stillwater.

3 TRAINS DAILY EACH WAY.

When Capt. Gill was traveling in the north of China a few years ago he fell in with an English mining engineer, the conditions of whose service under the Chinese government were particularly hard. He was congratulating himself upon the success of his researches in the Kai Ping hills, for he had been previously sent to examine the coal beds in other provinces, and when he had reported unfavorably on them the government had intimated that they had a very mean opinion of a mining engineer who could not find coal when ordered to do so—Youth's Companion.

ZEIT.
With gladdening eyes so greet the sun,
Who lifts his brow in varied light,
Bring light wherever your feet may run;
So bring a day to sorrow's night.
—Rose Hawthorne Lathrop.

GIVEN UP TO DIE.

The History of an Important Case.

Mr. John Anderson, whose portrait is shown here, relates a peculiar tale of suffering. He says that he has been in this country a little over a year and in that time has passed through several stages of disease.

Last November he had typhoid fever from which he slowly recovered and in February started work with Hamilton, the contractor and builder, but was unable to work but two weeks and has been getting worse ever since. He was troubled greatly with diarrhoea and cramps and pains in the stomach. When arising in the morning he had a great deal of trouble to clear his throat and head, and after eating anything he would find the stomach apparently filling with gas and the distress was so great he could hardly get about. He had a dull pain through the forehead, and there was noise in his ears, like a bell ringing or rushing sounds.

Since stopping work he has doctored until at last his physicians told him he was dying. He had a great deal of trouble to clear his throat and head, and after eating anything he would find the stomach apparently filling with gas and the distress was so great he could hardly get about. He had a dull pain through the forehead, and there was noise in his ears, like a bell ringing or rushing sounds.

Dr. O. Cosman,
Ethelbert O. Cosman,
Late of the Cincinnati College of Medicine and Surgery, Cincinnati, Ohio, has offered to examine and cure me.

Located at
26 FOURTH AVENUE WEST, third house above the Postoffice, Duluth, Minn. Where all curable cases are treated with medicine and diet, and the patient is perfectly cured. Consumption, Bright's disease, dyspepsia, and all nervous diseases. All diseases of the stomach and bowels, and all diseases of the liver and gall bladder, and all diseases of the kidneys and bladder, and all diseases of the lungs and throat, and all diseases of the skin and hair, and all diseases of the eyes and ears, and all diseases of the nose and mouth, and all diseases of the feet and hands, and all diseases of the head and neck, and all diseases of the back and spine, and all diseases of the arms and legs, and all diseases of the chest and abdomen, and all diseases of the pelvis and perineum, and all diseases of the genital organs, and all diseases of the reproductive system, and all diseases of the urinary system, and all diseases of the circulatory system, and all diseases of the respiratory system, and all diseases of the digestive system, and all diseases of the excretory system, and all diseases of the integumentary system, and all diseases of the nervous system, and all diseases of the muscular system, and all diseases of the skeletal system, and all diseases of the endocrine system, and all diseases of the immune system, and all diseases of the reproductive system, and all diseases of the urinary system, and all diseases of the circulatory system, and all diseases of the respiratory system, and all diseases of the digestive system, and all diseases of the excretory system, and all diseases of the integumentary system, and all diseases of the nervous system, and all diseases of the muscular system, and all diseases of the skeletal system, and all diseases of the endocrine system, and all diseases of the immune system, and all diseases of the reproductive system, and all diseases of the urinary system, and all diseases of the circulatory system, and all diseases of the respiratory system, and all diseases of the digestive system, and all diseases of the excretory system, and all diseases of the integumentary system, and all diseases of the nervous system, and all diseases of the muscular system, and all diseases of the skeletal system, and all diseases of the endocrine system, and all diseases of the immune system, and all diseases of the reproductive system, and all diseases of the urinary system, and all diseases of the circulatory system, and all diseases of the respiratory system, and all diseases of the digestive system, and all diseases of the excretory system, and all diseases of the integumentary system, and all diseases of the nervous system, and all diseases of the muscular system, and all diseases of the skeletal system, and all diseases of the endocrine system, and all A. S. MCGILVER, JOHN S. WOLF, JR. (Seal)
Geo. A. Buhar. (Seal)

Who is Most Compromised?
Taking it for granted that the most essential to perfect culture, the question arises, "What nation is the most compromised?" It would be the English, if they could have learned that first principle of compromise, namely, respect for those of another nationality, and the necessity of judging each nation by its own standard, or that of the world at large, rather than by a pair of mental and moral balances which the traveler carries with him. In this respect the Frenchman, no matter how much he may be infatuated with his own country, is far more generous than the Englishman. It is not hard to find a more agreeable traveling companion than the intelligent and traveled Frenchman. The Italian is modest in regard to his own country and highly appreciative of what they find good abroad. The tone of the German and Scandinavian renders their affiliation easy with all other peoples. The Russian are cosmopolitan by instinct, habit, education and travel. In France, the readiness to appreciate foreign excellence is augmenting. Elsewhere in Europe is long existed. The spirit of antagonism to everything foreign remains deeply ingrained in the English character, and will so remain probably for some time to come.

The American character is receptive. It is willing to imitate the good wherever found. This is the secret of our progress. It is not necessary for us to go abroad to become cosmopolitan, our country is so broad and has within itself such a variety of soil, climate and production, and so many elements of race and nation. Every foreigner is known to us without the necessity of going to see the countries whence they came. Add to these advantages that the people of no country travel so much, and we have reason to hope that if the true cosmopolite is not already to be found among us at the time is not far distant when we shall have all the cosmopolitan qualities that are consistent with an honorable patriotism.—San Francisco

Old Names for Queer Things.
Some things come by odd names. The most uncommon quality in man is called "common sense." A paper half a mile long is "a brief." A remarkably dirty devoid of sense is called "a glass."

CURIOSITIES OF ATAVISM.

The Otter Breed of Sheep—The Blue Pup.

Many of the most famous breeds of sheep and cattle have arisen through the accidental appearance of some striking peculiarity of structure, which has been preserved by careful selection and breeding. Thus the well known Ancon or other breed of sheep, now extinct, arose in the last century in Massachusetts by the accidental birth of a ram with crooked legs and a long back like a turnip. These peculiarities rendered him unable to leap fences, and as this was a point of great importance to the early settlers the ram was selected for breeding, and his abnormalities of structure were faithfully transmitted. The breeds of Mauchamp sheep and Nista cattle had a somewhat similar origin.

Darwin relates how in a litter of pointer pups one was observed to be of a blue color. This remarkable circumstance led to inquiry, and it was found that four generations earlier there had been in the same breed a pointer bitch named Sappho, celebrated for her blue color. We have here an instance of one of the secondary laws of inheritance known as the law of atavism from status, an ancestor.

According to this law any peculiarity, instead of passing directly from parent to child, may skip one or more generations and reappear lower down in the line of descent. Of this curious law innumerable instances occur. It is not uncommon for a child to resemble his grandfather much more closely than his father or mother. This is frequently noted in the case of animals, where we have the opportunity of observing several generations, and analogy would lead us to expect a similar principle in the case of man.

The law of atavism can only be explained by assuming that the qualities which were latent in grandfather and grandchild were latent in the intervening generations. There is nothing difficult or arbitrary in this hypothesis, as multitudes of facts are on record to prove that physical and intellectual peculiarities may remain dormant for long periods in an individual, and suddenly develop into prominence under some new pressure. Thus, privation or confinement in an unwholesome atmosphere may develop a latent tendency to consumption. A severe illness has been known to determine the onset of insanity, to which the individual had a hereditary predisposition, or to take more hopeful instances, a severe shock, such as bereavement or the sudden loss of fortune, has been frequently known to bring out unexpected traits of character, and to develop a resolution and a magnanimity of which the individual had previously exhibited no evidence. Our character, in addition to these prominent traits which attract general attention, have a multitude of secret marks traced as it were in variable ink and ready to spring into prominence on condition of the necessary stimulus being applied.—Chambers' Journal.

Mr. and Mrs. Gladstone.

Mr. and Mrs. Gladstone have entered the jubilee year of their wedded life. There were great rejoicings at the quaint old village of Hawarden. The home of the Grand Old Man is situated on the summit of a range of hills overlooking Chester and the River Dee. The village contains the remains of a castle which dates back almost to the Conqueror, and the ancient mound fortification, the ditch and drawbridge and the keep are proof today of its power in the past. The old castle standing in the grounds is scarcely more than a ruin now.

The modern castle in which the Gladstone family resides was built over a hundred years ago, and has been considerably added to from time to time so that it has a comparatively new seat. It has a splendid appearance, the stone battlements and walls, which have been or are being repaired, are striking. The grounds, which contain several points of interest, are exceedingly well wooded, even now to the surprise of many visitors who have heard so much of Mr. Gladstone's powers with the axe.

Mr. Gladstone lives a regular life at home. He breakfasts lightly about 7 o'clock in the morning, and shortly before 8 walks to the little village church for prayers. To the old servant bystander the sight of England's greatest statesman wending his way to church in the early morning is a sight to be remembered. Glad in a long coat, buttoned well up, with a long shawl wrapped closely round his neck and wearing a soft hat, his appearance is very different to when we see him in London. Yet his gait, as he walks lightly along, silently acknowledging the many fervid salutations from the villagers, is every inch that of the great and thoughtful old man. Upon his return from morning prayers Mr. Gladstone retires to his study, where he peruses and answers his enormous mass of daily correspondence.

When this task is completed Mr. Gladstone devotes himself to his favorite pastime—chopping trees—London Cor. New York Free.

The Wearing of Tights.

It may not be generally known that the wearing of tights is a decidedly unhealthy practice—there has never been any scientific principle applied to wearing them properly. They are simply drawn on as tightly as two or four strong arms can get them, and fastened by a leather belt around the waist. This belt has to be drawn in such a tension that what doctors call unhealthy facing is nothing in comparison with the torture to which women subject themselves in this manner. Articles have recently been written in reference to the wearing of tights in the circus ring and the bad results that usually follow for the women so employed.

But this is nothing compared to the system in vogue in comic opera and burlesque theatres. The circus rider has a ten or fifteen minute act to perform, and she does so for the night. The chorus girl dresses at half-past 7, and knows no relief until after 11. Louise Montague, who was the handsome Medora in "Cinderella," said not long ago that she did not believe any woman who was not compelled to wear tights would do so. It involved a large expenditure of physical force, and she would be quite exhausted at any time to accept \$25 a week less salary if she were not compelled to wear them. As an expert on this subject, she added that there was no doubt whatever that women's health was injured by this wearing of tights. Fortunately for herself she had not been compelled to do so for any length of time, but so far as her observation went, women became old before their time by means of these modern requisites of the stage.—The Argonaut.
